Matthew Russell Renfer

Senior Front-End Engineer

Atlanta, GA | 203-788-8782 | matthewrussellrenfer@gmail.com | matthewrenfer.com | linkedin.com/in/mattrenfer

SUMMARY

Senior Front-End Engineer with 15+ years in web development, owning production codebases from first request through launch and support for university, healthcare-staffing, and enterprise commerce sites. The last five years have centered on React/Next.js and headless CMS builds, instrumented with GA4 and Google Tag Manager to prove business impact. Turns stakeholder requests into accessible, performant features and owns them in production.

SKILLS

Front-End: React, Next.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass, Tailwind; state management (React state/Context, Redux)

CMS Platforms: Optimizely CMS, Contentful, WordPress (custom themes and plugins)

Analytics & Measurement: GA4, Google Tag Manager, Looker Studio, event tracking, conversion measurement, dashboarding

Performance, SEO & Accessibility: Lighthouse/PageSpeed Insights optimization, image optimization, caching, SEO-friendly routing and metadata, accessibility (WCAG guidelines, semantic HTML, keyboard navigation)

Integrations & Architecture: REST and GraphQL APIs, third-party API integration, reusable component libraries

Tooling & Deployment: Git/GitHub, CI/CD, AWS, Vercel, Cloudflare, Supabase (Postgres)

Collaboration: Agile development, cross-functional alignment, documentation, stakeholder communication

EXPERIENCE

Web Developer (Contract)

Mar 2026 – Jul 2026

Yamaha Motor Corporation, USA — Kennesaw, GA

- Owned front-end feature work on a headless commerce platform (Next.js + Optimizely CMS), turning stakeholder requests into shipped features, including an enhancement surfacing accessory installation instructions via the Oracle Knowledge (OKA) API; reused existing Owner's Manuals infrastructure to ship faster and avoid duplicate work.
- Implemented GA4 and Google Tag Manager across customer-facing pages, standing up event tracking and conversion measurement that gave the team visibility into user behaviors it previously lacked.
- Built Looker Studio dashboards translating raw analytics into stakeholder-ready insight, tying front-end changes to business outcomes.
- Diagnosed and shipped a production hotfix on an ambiguous cross-stack issue, isolating it to the front end and restoring the site's purchase/checkout flow.

Technologies: Next.js, TypeScript, Optimizely CMS, GA4, Google Tag Manager, Looker Studio, Oracle Knowledge API, REST

Interface Engineer

Jul 2021 – Jun 2025

Soltech — Atlanta, GA

- Served as lead front-end engineer on GaSSO, a Georgia state scholarship application built in React.
- Owned the SnapNurse-to-SnapCare rebrand as sole developer: built the new WordPress site from scratch within three weeks and launched the full rebrand in six; average monthly visits rose 25% in the four months after launch.
- Shipped GA4-instrumented landing pages and supported a new content and SEO strategy that grew organic traffic 23% quarter over quarter (Q1 to Q2 2024).
- Partnered with a solutions architect to implement performance improvements on a Vue 2 donation portal.
- Maintained and extended Soltech's flagship WordPress site, improving performance and searchability and reducing maintenance burden.

- Partnered with design, marketing, and backend teams to deliver performant, maintainable code; built reusable components and third-party API integrations that standardized design patterns and accelerated new project launches.

Technologies: React, Next.js, TypeScript, Vue.js, WordPress, Node, REST APIs, Docker, AWS, CI/CD

Senior Web Developer Sep 2020 – May 2021

Tactic Edge Solutions — Atlanta, GA

- Launched and maintained multiple WordPress-based marketing and application sites.
- Collaborated with product teams to develop new customer-facing features and improve user experience through design mock-ups and front-end enhancements.
- Implemented optimized WordPress themes and plugins to improve site performance and SEO visibility.
- Introduced UI refinements that increased client conversion rates and user engagement.

Senior Web Developer Dec 2015 – Sep 2020

Gardner-Webb University — Boiling Springs, NC

- Sole owner of the university's web codebase, translating requests from academic, administrative, and marketing stakeholders into shipped features as the university-wide web development lead.
- Delivered several website redesigns, migrations, and rebranding efforts, culminating in a custom WordPress theme still in use today.
- Managed the full project lifecycle, from requirements gathering through deployment, for new site sections, database-driven applications, and marketing campaigns.
- Launched redesigned enrollment landing pages that supported measurable growth in student applications.
- Ensured accessibility and performance compliance across university web properties.

Web Developer / Staff Writer Nov 2010 – Dec 2015

Gardner-Webb University — Boiling Springs, NC

Built and maintained gardner-webb.edu; trained staff on CMS/WordPress; supported enrollment web and alumni publications.

Web Developer Oct 2009 – Nov 2010

Image Marketing Group — NC

Built client web presences aligned to business goals; improved SEO and reduced support load.
